@ Sidoarjo, East Java, Indonesia

SKILLS

AI & Data Science
Python, TensorFlow, Keras, Scikit-learn,
Pandas, Matplotlib, R, Tableau, Streamlit

Generative AI / LLM
Claude API, RAG, Prompt Engineering

Backend
Laravel, FastAPI, Flask, PHP, Swagger, Java,
C++

Frontend
JavaScript, Vue.js, React, HTML5, CSS3,
Bootstrap

Database
MySQL, PostgreSQL, MongoDB, Redis

DevOps & Cloud
Docker, Google Cloud, AWS, Git

EDUCATION

M.Sc. in Informatics
In progress

B.Eng. in Informatics Engineering
Institut Teknologi Adhi Tama Surabaya ·
2021–2025
GPA 3.79 / 4.00

CERTIFICATIONS

BNSP Junior Web Developer
2023

Data Science for Business (DSBIZ)
International · 2024

AI for Business (AIBIZ)
International · 2024

Muhammad Mahameru Abidin

Data Scientist | AI Engineer

Data Scientist and AI Engineer with a strong foundation in Machine Learning, Computer Vision, Time-Series Forecasting and Full-Stack Development. I design and deliver end-to-end AI solutions — from model development to scalable, production-ready systems — turning complex data into real-world business value. Experienced in building intelligent systems for industrial environments, including computer-vision applications, predictive analytics, anomaly detection and AI-powered monitoring, with the engineering skills to integrate them into reliable products.

EXPERIENCE

Data Science Developer — PT Sarana Maju Lestari May 2025 – Present

- Own the design and delivery of production AI systems for industrial and energy clients, turning operational data into reliable, deployable solutions.
- Deploy real-time ML APIs (FastAPI/Flask, Docker) supporting decision-making for major energy-sector organizations.
- Develop sensor monitoring & anomaly-detection models and an automated crawling/scraping pipeline for KBLI/ILO company classification.
- Build a computer-vision safety-compliance (PPE) detection system for industrial use.

Web Developer & Data Analyst Trainer — Flashcom Indonesia Oct 2024 – Present

- Mentor aspiring developers and analysts in full-stack web development (HTML, CSS, JavaScript, Laravel) and data analysis with Python & Excel.
- Guide real-world project development and API integration; sharpen the ability to communicate complex technical concepts clearly.

Independent Full-Stack Developer — Freelance Oct 2024 – Present

- Partner with diverse clients to design and build end-to-end web systems — from data architecture and backend services to modern, responsive interfaces.
- Own the full delivery lifecycle, balancing scalability, maintainability and real-world impact.

Data Science Intern — PT BISA AI Academy Feb 2024 – Jun 2024

- Built machine-learning models (incl. music-genre classification) and analyzed e-commerce data to surface business insights.

SELECTED PROJECTS

Smart Sootblow Rule Analysis · Machine Learning

ML system for power-plant sootblowing optimization — compares Linear, Polynomial & Multivariate models to recommend data-driven operating rules (Python, Scikit-learn, Flask, Swagger, Docker).

XORCA Enterprise AI Assistant · Generative AI

Claude-powered, document-grounded enterprise chatbot served via a Flask API with Redis caching on Google Cloud.

PPE & Face Mask Detection · Computer Vision

Real-time YOLO-based safety-compliance monitoring from live camera feeds (Python, OpenCV, Flask, Docker, GCP).

LPPM Research & Community Service System · Full-Stack

Multi-role enterprise web platform for research/community-service proposals and reporting (Laravel, Blade, Bootstrap, PostgreSQL).
